To Whom It May Concern:

Greetings from the Knowledge and Human Development Authority (KHDA) in Dubai. The KHDA was established by the Government of Dubai under Law No. (30) of 2006 in April 2007. It is responsible for the growth, direction and quality of private education and learning in Dubai. It is a regulatory authority which supports the improvement of schools, universities, training institutes and other human resource sectors.

SciFest Dubai is a festival that celebrates science through the arts and culture and is led by Ms. Lara Matossian, Founder and CEO, and Mr. Rohan Roberts, Director of SciFest Dubai. It is a platform to promote creativity, critical thinking, innovation, and STEAM education. It also aims to encourage a love for science and a deeper understanding of the scientific method.

SciFest Dubai has collaborated with KHDA through our community engagement platform known as What Works Dubai; a series of community events that brings together educators from Dubai's private schools who either want to share something special they are doing in their schools or want to learn from other educators.

KHDA supports SciFest Dubai and its efforts in creating a further love for Science in Dubai's education community. I am confident that collaborating with SciFest Dubai will be a mutually beneficial partnership.

Please do not hesitate to contact me via phone or email should you have any questions.

Kind regards,

Ms. Mouza Al Suwaidi
Chief of Engagement
Knowledge and Human Development Authority
Dubai, UAE
